ARSLAN FAREED

SENIOR MERN / MEAN STACK ENGINEER | AI ENGINEER

Karachi, Pakistan | +92 312 2402132 | arslan.fareed.engr@gmail.com
LinkedIn | GitHub | npm

PROFILE

Senior full stack engineer with nearly seven years building production applications on the MERN and MEAN stacks - MongoDB, Express, React, Angular and Node.js - across e-commerce, travel and telecom domains. Currently focused on AI engineering: MCP servers, RAG pipelines and agentic workflows wired into live products. Delivered a 20% increase in GMV at Daraz (Alibaba Group) on a rebuilt top-up service, owned architecture decisions across multi-project delivery teams, and brings additional backend depth in Java and Spring Boot.

TECHNICAL SKILLS

Stack	MERN (MongoDB, Express, React, Node.js) and MEAN (MongoDB, Express, Angular, Node.js)
Languages	JavaScript, TypeScript, Java, SQL, HTML, CSS
Backend	Node.js, Express, NestJS, Koa, Serverless, Spring Boot
Frontend	React, Next.js, Angular, Ember.js, Redux, jQuery, Socket.IO
Mobile	React Native, Ionic, Cordova
Databases	MongoDB, PostgreSQL, MySQL, Redis
Cloud and DevOps	AWS, Google Cloud Platform, Alibaba Cloud, Docker, Git, CI/CD
AI and Architecture	Model Context Protocol (MCP), Retrieval-Augmented Generation (RAG), Agentic AI, Prompt Engineering, Microservices, REST APIs

EXPERIENCE

Xynotech — Mar 2026 - Present

Senior Software Engineer

React, Next.js, Angular, MCP, RAG, AWS, Java

- Built MCP servers and custom tools enabling AI agents to interact directly with internal applications and external services.
- Designed and implemented RAG solutions integrating enterprise data sources into AI-powered applications.
- Configured Claude-assisted development workflows and coding standards, reducing feature delivery time by 50%.
- Partnered with the product team on requirement gathering and technical solution design.

Futurbyte — Mar 2024 - Feb 2026

Senior Software Engineer

React, React Native, Node.js, Next.js, Angular, Ember.js, Ionic, Cordova, PostgreSQL, RAG, AWS, Java

- Delivered client platforms end to end on React and Node.js, including **5lynx**, a RAG-powered service provider app; **Edsidera**, a summer camp management app; and **Eightclouds**, a business website.
- Owned architecture and technology decisions across concurrent client projects, balancing delivery timelines against long-term maintainability.
- Established engineering standards - code review process, branching strategy and development guidelines - adopted by a team of 12 engineers.
- Partnered with cross-functional stakeholders to translate business objectives into technical roadmaps and delivery plans.

Daraz (Alibaba Group) — Nov 2021 - Feb 2024

Senior Software Engineer

React, React Native, Node.js, Angular, MySQL, Alibaba Cloud, Java

- Revamped the existing top-up service, driving a 20% increase in gross merchandise value (GMV).
- Investigated and resolved complex production issues, improving overall platform stability.
- Partnered with the product team to analyse business requirements and define technical solutions.

Find My Adventure — Jan 2021 - Nov 2021

Senior Software Engineer

Node.js, Koa, Angular, Ionic, Cordova, MongoDB, Redis, AWS

- Built 7 new Node.js microservices while migrating a monolithic application to a microservices architecture.
- Hardened the authentication service, strengthening account security for customers.
- Redesigned the order journey, reducing the number of steps required to complete an order.

Inertiasoft — Nov 2019 - Dec 2020

Software Engineer

Node.js, Express, MongoDB, React, Angular, Ember.js, Ionic, Cordova, AWS

- Automated OLT/ONT network device configuration, removing manual provisioning effort.
- Reduced script runtime by 90% by re-architecting synchronous processing into an asynchronous model.
- Migrated the application to AWS, cutting system running costs by 25%.

EDUCATION

Bachelor of Science in Computer Science / IQRA University — 2015 - 2019

A-Levels (Pre-Engineering) and O-Levels (Computer Science) / IGCSE — 2009 - 2014
